The Mission of the Department of Family and Community Medicine is to educate students and residents in family medicine with an emphasis on meeting the needs of the economically disadvantaged and the medically underserved; to advance knowledge in family and community medicine; and to develop methods of primary care that are effective, efficient, and accessible to all people.

We are in a time of reform of health care that is unprecedented in my 25 years of working as a family doctor. In addition to the Affordable Care Act’s expansion of health insurance coverage, a powerful wave of transformation of the health care delivery system is occurring—one that puts family medicine front and center.

Soon after signing the Affordable Care Act into law, President Obama was asked by a citizen at a town hall forum about his views on primary care. The President responded, “It used to be that most of us had a family doctor; you would consult with that family doctor; they knew your history, they knew your family, they knew your children, they helped deliver babies. How do we get more primary physicians, number one; and number two, how do we give them more power so that they are the hub around which a patient-centered medical system exists, right?” To which we in the Department of Family and Community Medicine answer, “Right on!”

**Answering the Call: Training the Primary Care Workforce**

One way we are responding to the President’s call is by expanding our training of exceptional family physicians. The UCSF Family and Community Medicine Residency Training Program at San Francisco General Hospital (SFGH) has grown from 13 to 15 residents per year. We are also growing our regional network of affiliated family medicine residencies. In addition to our longstanding affiliations with the Santa Rosa, Salinas/Natividad, and Fresno programs, we are in the process of completing new affiliation agreements with the Contra Costa County Family Medicine Residency Training Program and the first Kaiser Permanente family medicine residency in Northern California, to be based in Vallejo. In addition to residency training, all network programs are involved in educating UCSF medical students at their sites, providing a robust, diverse network of community-based education in family medicine at UCSF. As one of our colleagues remarked at our annual network meeting, “The San Francisco Bay Area will be the Mecca of family medicine education.”

UCSF medical students are heeding the President’s exhortations. Twice as many senior students have declared their intent to apply for family medicine residencies relative to the numbers in recent years. The Department’s Director of Predoctoral Education, Margo Vener, captured the spirit of this renaissance of primary care in her comment cited in a front page article in the *San Francisco Chronicle* appearing January 2, 2013. “It’s increasingly clear,” the article quoted Margo as declaring, “that the cutting edge in medicine is primary care.” Also reflecting this shifting tide, the Association of American Medical Colleges featured UCSF in an article in its November, 2012 *Reporter* under the headline, “Research-Intensive Medical Schools Expand Focus to Build Primary Care Workforce.” Faculty member Beth Wilson and SFGH resident and UCSF Medical School graduate Monica Hahn were cited in the article, with Monica commenting, “I feel very fortunate to have trained at [UCSF], where primary care is valued. Although it is a research-heavy institution, there is community-based research and research on primary care, health disparities, and policy.”

**Answering the Call: Transforming Primary Care**

In addition to our efforts in workforce development, the Department is playing a leading role in reengineering primary care to create Patient-Centered Medical Homes. Many health care organizations are adopting a conceptual blueprint for redesigned primary care—the 10 Building Blocks of High Performing Primary Care—developed by Tom Bodenheimer and colleagues at the UCSF Center for Excellence in Primary Care after careful study of high-functioning practices. The 10 Building Blocks model has been adopted by the California Advanced Primary Care Institute, a statewide coalition of leading health care organizations, and is also guiding reform of primary care in safety net clinics throughout the state. On the home front, our Family Health Center at SFGH, the largest primary care clinic in the SF Department of Public Health’s (SFDPH) clinic network, is expanding weeknight and weekend hours and rapidly increasing the number of patients served to meet the demands for greater access to care under health reform, and implementing innovations such as
full integration of behavioral health services into primary care. The UCSF Lakeshore Family Medicine Practice is working on team “huddles” and other innovations as it prepares to apply for NCQA Patient-Centered Medical Home recognition. Our Department’s researchers are evaluating the impact of these reforms on both patients and workers at UCSF and SFDPH primary care practices. In a related initiative, faculty member Ron Labuguen has pioneered implementation of Toyota Lean processes at the SFGH Urgent Care Center, and is now helping to lead adoption of Lean methods across the hospital.

Answering the Call: Making Care Truly Patient-Centered

The Department is making the “patient-centered” part of the Patient-Centered Medical Home authentic by engaging patients as partners in the transformation process. We continue to set a standard for our own health systems through our patient advisory councils at the SFGH Family Health Center and UCSF Lakeshore Family Medicine Practice. Patients of the SFGH Urgent Care Center were members of the “Lean Team,” working side by side with staff to improve workflows. Department research teams have successfully competed for grants from the Patient Centered Outcomes Research Institute (PCORI); Dave Thom is investigating the role of health coaches in helping patients make health care decisions, and Christine Dehlendorf is leading a new study of patient-centered support for contraceptive decision making.

Answering the Call: Improving Population Health

Our work in the Department humbly acknowledges that medical care is but one factor—and not the dominant factor—in producing a healthy population and eliminating health disparities. Paula Braveman and her team at the Department’s Center on Social Disparities in Health continue to provide research support to the Robert Wood Johnson’s high-profile Commission to Build a Healthier America. Faculty member Laura Gottlieb is co-founder of a new national resource center www.healthbegins.org, that provides practical tools to clinicians on how to address social determinants of health in the patient care setting. Faculty member Shira Shavit and her community partners received a UCSF Excellence in Community Partnership Award for the Post Release Wellness Project, which trains community health workers to link recently paroled individuals with primary care and social service resources. Many Department members were instrumental in UCSF being awarded the 2012 Spencer Foreman Award for Community Service from the Association of American Medical Colleges, an award recognizing exceptional university efforts in community engagement. This award cited several programs developed and staffed by Department members, such as the Clinical and Translational Science Institute’s San Francisco Health Improvement Partnership Program, the Office of University Community Partnerships, and the Program in Medical Education for the Urban Underserved (PRIME-US).

Conclusion

These are just a few highlights of the remarkable work being done by the Department of Family and Community Medicine. I invite you to read our Annual Report and learn more about our exceptional people and programs. It is a privilege to serve as chair of the family and the community that is the UCSF Department of Family and Community Medicine.

-Kevin Grumbach, MD
The Department of Family and Community Medicine expresses heartfelt gratitude to all donors who supported us in 2012-2013. Our supporters play a vital role in helping the Department to carry out its mission.

We would like to give special mention to the following major donors for their contributions this year.

Mr. George Ayala
Dr. Joseph C. Barbaccia
The California Endowment
California Physicians Group Foundation
Community Health Partnerships, Inc.
Mr. Martin Escandon
Mrs. Jeannette W. Eliasberg
Mr. Chris Hais
Ms. Sandy Nakamura
Mr. J. Phillip Samper
San Francisco Health Plan
Mr. Theodore P. Shen and family
Dr. David Werdegar
Zen Hospice Project

The Clara Shen Teaching Fund

The Clara Shen Teaching Fund in the Department of Family and Community Medicine was established in 2012 through a generous gift of $250,000 from Ted and Mary Jo Shen, to honor Ted’s mother Clara, a long-time patient of faculty member Dr. Daniel Pound. The goal of the fund is to support Dr. Pound, a family physician geriatrician and Medical Director of the UCSF Center for Geriatric Care, in expanding a curriculum in home visits to bolster the caliber of geriatric training of UCSF medical students and inspire more students to devote themselves to careers in primary care for older adults.

In the 2012-2013 academic year, The Clara Shen Teaching Fund supported geriatric training for 101 of the 150 third-year medical students. Eighty students accompanied Dr. Pound on home visits, where they discovered the importance of a patient’s home environment to his or her care. During the upcoming year, Dr. Pound plans to involve 122 of 150 students and take 98 students on home visits. The curriculum also includes multidisciplinary seminars taught by Dr. Pound, a social worker, and a home health nurse on collaborative care for home-bound patients.

Clara Shen passed away in February, 2013, soon after celebrating her 100th birthday with her family and Dr. Pound at a reception at the UCSF Lakeside Senior Medical Center. The Department greatly appreciates the generosity of the Shen Family and their commitment to enhancing medical education to prepare physicians to provide holistic primary care for older adults.

Diversity

The Department of Family and Community Medicine continues to promote diversity in all facets of our work and a climate of inclusion in our places of work and learning.

Clinical Care

We are committed to serving diverse and vulnerable patient populations. One of our clinical sites, the Family Health Center, is the largest primary care clinic within the San Francisco public health clinic network, serving predominantly low income and minority patients. The Department helps lead the Post Release Wellness Project, training community health workers to link recently paroled individuals with primary care and social service resources.

Education

Our residency program has distinguished itself by attracting a remarkably diverse group of residents. For the past four years, more than 30% of our residents have been from ethnic and racial groups underrepresented in medicine. The Department also provides leadership for the Program in Medical Education for the Urban Underserved (PRIME-US), a special UCSF track for medical students from diverse backgrounds who are committed to caring for urban underserved communities.

Research

Our Department is dedicated to reducing health disparities and increasing workforce diversity through research. The Center for Social Disparities in Health addresses the need for more reliable and timely information, as well as better use of existing information, to guide efforts to reduce social disparities in the United States and other countries. The Community Engagement & Health Policy Program in the Clinical & Translational Science Institute bridges academic research, health policy, and community practice to improve the health of diverse populations.

Service

The Department’s Center of Excellence for Transgender Health strives to increase access to comprehensive, effective, and affirming health care services for trans and gender-variant communities. The Office of Developmental Primary Care is dedicated to improving health outcomes for people with developmental disabilities across the lifespan. In addition to leading these types of programs, Department members spend considerable time and energy volunteering at UCSF and in the local community to advocate and improve the health of diverse populations. Department members have served on the Chancellor’s Committee on Campus Culture, Climate and Inclusion, the Chancellors’ Advisory Committee on GLBTI issues, the Chancellor’s Advisory Committee on Disability Issues, and the University Community Partnership Council; volunteered as preceptors at student-run clinics serving disadvantaged, low income and minority populations including the Homeless Clinic, Clinica Martín Baró, the Mabuhay Health Center, and the LGBT Suitcase clinic; and volunteered for local organizations, advisory boards, and tutoring and mentoring of disadvantaged youth.

Education

The Department of Family and Community Medicine plays a leading role in a full continuum of educational programs at UCSF.

- Our faculty ensures that every UCSF medical student is taught fundamental generalist clinical skills and patient-centered primary care.
- We emphasize preparation of culturally competent family physicians to meet the needs of underserved communities through a family practice residency training program at San Francisco General Hospital and three other affiliated family practice residencies in Northern California.
- We are training the next generation of academic leaders in family and community medicine through family medicine postdoctoral research and faculty development fellowships.
- We provide continuing medical education courses and other educational support to practicing physicians and health professionals.

Predoctoral Education

Predoctoral Leadership

Margo Vener, MD, Director of Predoctoral Education, Clerkship Director
Roy Johnston, Student Programs Manager, Clerkship Administrator
Sandi Borok, Model SFGH Administrator, Curriculum Program Administrator

Site Directors

Laura Hill-Sakurai, MD, UCSF Family Medicine Center at Lakeshore
Jamie Weinstein, MD, and Laurie Cederberg, MD, Santa Rosa Family Medicine Residency
Adam Bolour, MD, Natividad Medical Center, Salinas
Erica Hansen, MD, and Lindsey Maggi Pierce, MD, Kaiser–Oakland
Hugh Yang, MD, and Lydia Herrera-Mata, MD, Community Regional Medical Center, Fresno

The Department of Family and Community Medicine (FCM) is actively involved in learning opportunities at all levels of medical school education. In the Essential Core Curriculum, FCM faculty members are involved in Foundations of Patient Care and teach in small groups, provide physical examination instruction, and give lectures. In the Clinical Core, FCM 110 is a required six-week clerkship offered at sites in San Francisco, the Bay Area, Salinas, and Fresno. FCM faculty direct the Longitudinal Clinical Experience and Model SFGH for third-year students. In addition, a wide variety of electives, including clinical and research experiences, are offered throughout all four years of medical school. Through their involvement in required and elective courses, students are given the chance to learn about and experience the many facets and multiple opportunities of Family Medicine.

The Primary Care Leadership Academy

The Primary Care Leadership Academy at UCSF is a collaboration of students, residents, and faculty in all primary care fields working together to promote primary care. The goals of the Primary Care Leadership Academy are to promote learner engagement in primary care innovations efforts; support career interests in primary care; and enhance primary care education, mentoring and advocacy.

The Primary Care Leadership Academy at UCSF seeks to engage students, residents and faculty in practicing primary care, engaging in primary care innovation efforts, promoting primary care careers, developing mentorship, increasing the status of primary care, and advocating locally and nationally for efforts to improve primary care and preventive health efforts.
The Program in Medical Education for the Urban Underserved (PRIME-US)

Program Leadership
Kevin Grumbach, MD, Chair, Oversight Committee
Alma Martinez, MD, MPH, Executive Director
Elisabeth Wilson, MD, MPH, Program Director
Aisha Queen-Johnson, MSW, Program Manager

PRIME-US is part of a statewide initiative to increase the number of physicians working in underserved communities. FCM faculty and staff have held leadership roles in PRIME-US since it was launched in 2006. The five-year longitudinal program offers student participants the unique opportunity to pursue their interest in working with urban underserved populations at the individual, group and community levels. The curriculum includes a summer orientation, monthly seminars and site visits, community engagement and projects, clinical placements in underserved settings, leadership development opportunities, a required master’s degree, and strong mentorship.

The UCSF/SFGH Family and Community Medicine Residency Program is an integral part of the UCSF Department of Family and Community Medicine. It is based at San Francisco General Hospital (SFGH), the premier publicly-funded hospital in the nation, and is also a part of a network of publicly-funded community health centers that provide care to a diverse population. All continuity training sites and the majority of rotation sites are within SFGH.

Our primary mission is to prepare family physicians for practice in urban underserved areas and to improve the representation of ethnic minorities in our profession. Our curriculum is guided by the residents’ experiences and provides them with the skills, knowledge, and perspectives necessary for working effectively with individuals and families of diverse racial, ethnic, cultural, and socioeconomic backgrounds. With important input from residents, our faculty has designed many innovative programs over the years; these continue to shape our residents’ training and have often served as models for the training of family physicians throughout the country.

Since 1973, the residency program has trained 431 family physicians; our current residency cohort includes 15 residents in each of three post-graduate years. Many of our alumni currently practice in state- or federally-designated medically underserved communities. While most alumni are in practice in California, a growing number of alumni are involved in teaching and research throughout the United States.
The UCSF Fresno Family Medicine Residency has graduated over 250 residents since its inception in 1970. It is a model for community-based training, balancing service and education needs for a large multi-cultural underserved population. UCSF Fresno offers outstanding ambulatory and inpatient care, including obstetrics, in a variety of settings. The program is distinguished by its urban and rural family health centers and by its weekly educational half-days covering behavioral science, family medicine, geriatrics, and procedural skills topics.

UCSF Fresno residents receive a wealth of clinical experience in a range of settings. Residents work at Community Regional Medical Center (CRMC) caring for a large multi-cultural, indigent population. Family medicine residents also work at Selma Community Hospital, Community Medical Center-Fresno, Kaiser Permanente Medical Center-Fresno, and Veteran’s Administration Central California Health Care System (VA).

Located in downtown Fresno, CRMC recently underwent a $245 million dollar expansion and the campus includes a spectacular new home for the UCSF Fresno Medical Education Program. Administrative offices for family medicine as well as six other residency programs are located in the new UCSF Fresno Center.

Selma Community Hospital provides all of our residents with a unique rural experience, including operative obstetrics in a hospital run by family physicians and administered by the well-established Adventist Health System. It is adjacent to our family health center in Selma.

UCSF Fresno Family Medicine residents experience a variety of community-based training sites. Rotations in psychiatry, geriatrics, ambulatory procedures, and outpatient gynecology contribute to resident training. UCSF Fresno residents benefit from outstanding behavioral science training that incorporates shadowing, videotaping, formal behavioral science feedback, and an integrated series of presentations on behavioral science and multi-cultural topics. Residents are provided certification training in Advanced Trauma Life Support (taught by the UCSF Fresno surgery program), Advanced Life Support in Obstetrics (taught by family medicine faculty), Advanced Cardiac Life Support, and Neonatal Resuscitation (taught by the UCSF Fresno pediatric program).

UCSF Fresno graduates have found that the education they receive has allowed them to be independent practitioners who are confident in their knowledge and skills in all areas of family medicine.

UCSF Fresno Medical Education Program FCM Residency Class of 2013

Raul Ayala, MD

Carlos Yoo, MD
Salinas/Natividad Medical Center  
Residency Leadership  
Steven Harrison, MD, Residency Director  

Affiliated with the UCSF, Natividad is an unopposed county hospital residency located two hours south of San Francisco and a short distance inland from Monterey Bay. We have a total of 24 residents who have primary clinical responsibility for all of their patients. Our dedicated faculty members take pride in their supervision of patient care and in their teaching.

We are proud of our mission “to educate residents in the principles and practice of Family Medicine and prepare them to provide continuous, comprehensive, and culturally-sensitive, contextual care to underserved and rural populations.” While we have graduates in many different types of practices and many different places, we are also fortunate that many of our graduates have remained on the Central Coast, caring for the underserved here in our own area.

The Residency continues to be a strong, integral part of our community. Our dedication to outstanding patient care and broad-based Family Medicine education is appreciated and admired by all. While our special strengths are general inpatient care and maternal-child medicine – (our R1s perform more than 200 deliveries each year and our pediatric experience is extensive), - our clinical experiences in ambulatory chronic disease management and community medicine are also outstanding. We truly believe in developing our residents’ “clinical common sense,” and provide well-rounded training to prepare them to work anywhere in the United States or the world!

Santa Rosa Family Medicine Residency Class of 2013

Angelica Salazar, MD  
Aurelio Gonzalez, MD  
Nicholas Urrutia, MD  
Catherine Avener, MD

Santa Rosa Family Medicine Residency  
Residency Leadership  
Jeff Haney, MD, Residency Director  

With the initiation of formal training in general practice dating back to 1938, Santa Rosa Family Medicine Residency has an established tradition of excellent training with the strong support of both community family physicians and specialists. Many of the program’s graduates live in the area and have become active teachers in the program as well as leaders in the medical community.

In the years following the Gold Rush and the Civil War, Sonoma County needed a center for the care of the indigent. In its early years the county hospital provided care for recent immigrants and the poor and served as a
tuberculosis asylum. By 1938, a nationally renowned two-year general internship was formally established at County Hospital of Santa Rosa. In 1969, the program became affiliated with the University of California, San Francisco providing additional teaching resources that include visiting faculty for grand rounds presentations, resources for research projects, and University recognition for faculty and residents. Simultaneously, with the formal acknowledgment of Family Practice as a specialty, the program became a Family Practice Residency. Since that time, it has achieved national recognition for its outstanding work in preparing family physicians to enter the full spectrum of practice care.

In March 1996, Sutter Health leased Santa Rosa Community Hospital from the County and assumed its management, as well as management of the residency program. Since that time, Sutter Medical Center of Santa Rosa has supported the residency in its consistent excellence and provision of care to the county’s marginalized population. The 36 family medicine residents at the Santa Rosa Family Medicine Residency are top graduates of medical schools throughout the United States and overseas. The teaching staff comprises over 120 full-time, part-time, and volunteer instructors, including geriatricians, pediatricians, obstetrician/gynecologists, many community-based family physicians, and several psychologists. Specialists also staff outpatient specialty clinics in areas of neurology, dermatology, endocrinology, rheumatology, and surgery. The residency program prepares graduates for certification by the American Board of Family Practice and is currently accredited by the Accreditation Council on Graduate Medical Education.

Postdoctoral Research Fellowship Program

Primary Care Research Fellowship
Program Leadership, Family and Community Medicine
David Thom, MD, PhD, Fellowship

The UCSF Department of Family and Community Medicine has, since 1998, offered two-year or three-year full-time fellowships for individuals wishing to prepare for careers that will include research in the field of Family Medicine. In 2008, the program joined forces with the UCSF Division of General Internal Medicine to form a new joint primary care research fellowship program. This joint program provides a broad range of research and training opportunities for fellows, as well as a large critical mass of fellows with whom to work. Fellows meet with core fellowship faculty weekly throughout most of the year to report on progress and hear presentations related to their career development, complete course work qualifying them for a Masters of Clinical Research degree, and design and conduct mentored research projects.

2012-2013 Primary Care Research Fellows (Family Medicine)
Fellow: Elizabeth Uy-Smith, MD, MPH
Areas of Focus: School-based health centers; contraceptive access
Mentors: Kevin Grumbach, Susan Egerter, David Thom
Northern California Faculty Development Fellowship Program

Program Leadership
Jessica Muller, PhD, Fellowship Director
Walter Mills, MD, Fellowship Co-Director

Since 1990, the UCSF Department of Family and Community Medicine has offered a Faculty Development Fellowship Program for faculty in family medicine residency programs and departments in Northern California. Over 250 fellows have completed the program, many of whom now hold leadership positions throughout Northern California.

This one-year, part-time fellowship focuses on the knowledge, attitudes, and skills needed to be an effective faculty member. It includes:

- 12-14 fellows annually
- 8 three-day residential sessions, held monthly in the San Francisco Bay Area from October – May
- A core curriculum of essential skills, including:
  - One-on-one and small group teaching
  - Formal presentations
  - Curriculum design
  - Leadership and negotiation
  - Scholarship
  - Professional development
  - Life-long learning skills
  - A scholarly project selected by the fellow
  - Between-session activities at the fellow’s home site
  - The opportunity to reflect on and apply learning
  - A network of colleagues!

San Francisco General Hospital and Trauma Center
San Francisco General Hospital and Trauma Center (SFGH) is the sole provider of trauma and psychiatric emergency services for the City and County of San Francisco. A comprehensive medical center, SFGH serves some 100,000 patients per year and provides 20 percent of the city’s inpatient care. As San Francisco’s public hospital, SFGH’s mission is to provide quality health care and trauma services with compassion and respect to patients who include the city’s most vulnerable. SFGH is also one of the nation’s top tertiary academic medical centers, partnering with the University of California, San Francisco School of Medicine on clinical training and research.

Family Health Center
Clinical Leadership
Hali Hammer, MD, Medical Director

The Family Health Center (FHC), including the Refugee Medical Clinic, provides comprehensive, multidisciplinary health care services to patients along a continuum of care that includes health promotion, disease prevention, urgent care, continuity ambulatory care services and specialty clinics (prenatal, diabetes). Care is delivered within a primary care continuity provider model that optimizes use of health care resources. This coordinated, comprehensive approach incorporates patient education, counseling, and the selective use of diagnostic, screening and therapeutic services directed toward health maintenance and early diagnosis and treatment of illness. The FHC provides the full scope of primary care services for children, adolescents, adults, the elderly, and homebound patients. Our services include continuity and urgent care for all ages, prenatal care and perinatal case management, family planning, HIV family clinic services, well child care, minor office procedures, mental health services, social services, substance abuse counseling, nutrition consultation, diabetes education and case management, nurse case management and pharmacist consultation. The FHC also provides primary care for residents of the SFGH Behavioral Health Center.
The FHC is a Federally Qualified Health Center and the largest primary care clinic in the San Francisco Health Network. Patients receiving care reflect the rich ethnic and socioeconomic diversity of San Francisco—they speak twenty-nine different languages, 70% are ethnic minorities, 60% are uninsured, 25% receive Medi-Cal, and 2% are homeless. The clinician staff consists of over 80 PCPs, including nurse practitioners, a physician assistant, residents and faculty physicians. Our staff also includes Health Workers, Medical Assistants, Registered Nurses and clerical support staff. Providers of ancillary service at the FHC include a Behavioral Health Team, comprising psychologists and social workers, nutritionists, and pharmacists.

The FHC is the primary ambulatory training site for the UCSF/SFGH Family and Community Medicine Residency Program. All 45 FCM residents have their continuity clinics at the FHC. The FHC is also a key training site for UCSF medical, nurse practitioner, and pharmacy students.

**Fiscal Year 2012-2013**
- Total unduplicated patients: 11,723
- Total patient visits: 51,347

Adult Urgent Care Center

Clinical Leadership
Ronald Labuguen, MD, Medical Director

“The mission of the Urgent Care Center is to support the health care safety net in San Francisco by meeting the unmet need for urgent care, and by promoting the health and welfare of patients, including linkage to primary and specialty care. The vision of the Urgent Care Center is to provide quality health care, prompt and courteous service, and access to primary and specialty care, in a safe and comfortable environment.”

The Urgent Care Center (UCC) is open to adult residents of San Francisco in need of same day walk-in medical care. The UCC is open 7 days a week, 365 days per year. Most patients refer themselves. Some are primary care patients of the San Francisco Health Network (SFHN) and the San Francisco Community Clinic Consortium who are unable to be seen in their home clinics for same day care. Patients may also be referred by the SFGH Emergency Department. The UCC medical staff provides a wide range of diagnostic and treatment services focused on the respiratory, cardiovascular, gastrointestinal, gynecological, orthopedic, neurological, and dermatological systems; infectious diseases; and a limited number of outpatient clinic procedures.

As part of its mission to link patients to primary care, the UCC runs the Primary Care Pathway program, which connects unlinked patients with uncontrolled diabetes and/or hypertension to their own primary care provider. Since the inception of the program in December 2008, the UCC has successfully linked hundreds of patients with these chronic conditions to primary care clinics throughout the safety net.

In July 2012, the Urgent Care Center was the first service at San Francisco General Hospital and Trauma Center to launch “Lean,” a management system of continuous quality improvement, focused on meeting patients’ needs as efficiently as possible. Our goals with Lean are to: (1) decrease total visit time; (2) increase patient satisfaction; and (3) increase staff satisfaction. As of September 2013, assessment of our target measures shows that:

1. Total visit times have decreased from a median of 161-251 minutes to 100-120 minutes
2. Overall patient satisfaction has increased from 3.76 to 4.39 on a 5-point scale (3=OK, 4=good, 5=great)
3. Staff satisfaction has increased on two scales (“would recommend UCC as a place for a friend or relative to receive care,” from 5.16 to 6.09; “would recommend UCC as a place for a friend or relative to work,” from 6.49 to 7.00).

The UCC’s experience serves as a basis for improvements throughout SFGH using the Lean methodology.

Fiscal Year 2012-2013

* Total patient visits: approximately 29,000

Major Discharge/Treatment Diagnoses
1. Hypertension
2. Back pain
3. Cough
4. Knee pain
5. Disorders of soft tissue
6. Upper respiratory tract infection
7. Pharyngitis
8. Diabetes
9. Ankle pain
10. Urinary tract infection

Family Medicine Inpatient Service

Clinical Leadership
Margaret Stafford, MD, Acting Medical Director
Jack Chase, MD, Acting Associate Medical Director

The Family Medicine Inpatient Service (FMIS) provides acute inpatient care to adults. Patients are admitted from the FHC, the Primary Care Network Clinics of the San Francisco Department of Public Health (DPH), the San Francisco Community Consortium Clinics, and the SFGH Emergency Department.
FMIS is staffed by four R1s, two R2s, two R3s, one chief resident, and two attending physicians. A clinical pharmacist, pharmacy students, and one to two medical students are also on the service at most times. FMIS teams care for patients with a high level of complexity, including acute illnesses, such as sepsis, COPD, CHF, and GIB, as well as complications of chronic diseases, such as diabetes, hypertension, HIV/AIDS and cancer. FMIS collaborates with medical and surgical consultative services in co-management of complex patients, and in development of innovative educational and quality improvement programs.

**Fiscal Year 2012-2013**
- Total admissions: 1,366
- Average daily census: 18.8 patients
- Average length of stay: 4.45 days

**Top Ten Diagnoses**
1. Chest pain
2. Chronic Obstructive Pulmonary Disease
3. Sepsis
4. Gastrointestinal bleeding
5. Congestive Heart Failure
6. Abdominal pain
7. Cellulitis
8. Pneumonia
9. Asthma
10. Altered mental status

Skilled Nursing Facility

Clinical Leadership
Shieva Khayam-Bashi, MD, Medical Director

The SFGH Skilled Nursing Facility (also known as 4A) provides skilled nursing and rehabilitation care. Although physically a part of SFGH, 4A is actually an outpatient unit. The average age of 4A patients is 50 years, and the average length of stay is approximately 20 days. The most common indications for SNF care include continuation of IV antibiotics, wound care, and short-term rehabilitation.

The staffs’ deeper mission is to provide a holistic and interdisciplinary model of care, addressing our patients’ needs for healing and recovery from a bio-psychosocial and spiritual level. We try to maintain an atmosphere on 4A of acceptance, community, compassion, and encouragement. Through regular contact with caring staff from multiple disciplines, including —family practice, nursing, rehabilitation, nutrition, social work, and activities—4A patients return to a level of independent function; many patients regain a sense of community, self-respect and purpose.

Fiscal Year 2012-2013
• Total beds: 30
• Average daily census: 20.1
• Average length of stay: 21 days

UCSF Family Medicine Center at Lakeshore

Clinical Leadership
Katherine Strelkoff, MD, Medical Director

The UCSF Family Medicine Center at Lakeshore offers primary care for patients of all ages including infants, children, adults and seniors. In family medicine, all members of a family may receive medical care from the same doctor.

Our mission is to provide extraordinary primary care. We are the medical home from birth to old age for patients from all walks of life and diverse cultural and family backgrounds. We aim to create a learning and healing environment with our patients, students, and colleagues, and to model innovative, conscientious, high-quality care.

At Lakeshore, family physicians and family nurse practitioners provide a wide range of primary care services including, preventive medicine, care of ongoing chronic illnesses and treatment of acute or serious problems. Services also include prenatal care and dermatology.

When a patient needs more specialized care such as laboratory, X-ray, or emergency services, the staff at Lakeshore refers patients to the appropriate specialist and department at UCSF Medical Center. Lakeshore doctors communicate and collaborate with specialists and hospital doctors to ensure that their patients receive the most complete care available.

Fiscal Year 2012-2013
• Total panel volume: 10,378
• Total patient visits: 20,918
UCSF Lakeside Senior Medical Center

Clinical Leadership
Daniel Pound, MD, Medical Director

Patients at the Lakeside Senior Medical Center receive personalized care from doctors, nurses and social workers who are trained in the special needs of seniors and specialize in caring for older adults. Each member of the staff reflects the UCSF Medical Center’s tradition of excellence. Lakeside Senior Medical Center gives patients the kind of personal attention that too often has become a thing of the past. Patients also have access to other UCSF specialists and health professionals.

Podiatry and laboratory services are provided on site. Physical therapy and radiology services are available nearby.

Fiscal Year 2012-2013
- Total panel volume: 850
- Total patient visits: 4,337

UCSF and Partners Primary Care Summit
Friday, September 7, 2012

The first-ever UCSF and Partners Primary Care Summit aimed to promote cross-learning in primary care practice and educational transformation across the three major health delivery systems in San Francisco in which UCSF is involved: the UCSF Medical Center, SF Department of Public Health, and SF Veterans Administration Medical Center.

This illuminating full-day event was structured around both primary care clinical practice and education. Plenary presentations provided status updates of primary care practice reform efforts within each of the three systems, while breakout sessions explored specific topics focusing on concrete learning and tools. Topics included the structure and process for: complex care management; teams and teamlets in teaching clinics; behavioral health integration in primary care; panel management and health IT; and care transitions. On the education side, site representatives discussed engaging students, residents, inter-professional teams, the community, and the nation at large.

The summit demonstrated that collaborating with our partners in primary care transformation can spark the necessary conversations and inspire action. Given its success, the summit will be a regular event, with the next convening slated for 2014.

State of the Department
Thursday, September 13, 2012

Dr. Kevin Grumbach, Department Chair, presented the annual State of the Department Address on September 13, 2012 at Carr Auditorium at San Francisco General Hospital. His presentation addressed the entire department, including faculty, staff, residents, and clinicians, and highlighted FCM milestones such as rewards and recognitions, the work of various FCM clinical programs and research projects, strategic planning, education, community engagement, and news impacting the entire university. This annual event provides an exciting and comprehensive look at the great work being done across the many facets that comprise Family and Community Medicine at UCSF.

SF HIP Aligning Assets Convening
Thursday, March 28, 2013

San Francisco Health Improvement Partnerships (SF HIP) hosted a multi-stakeholder collaboration in an effort to align the diverse assets of people and organizations to improve community health and health equity in San Francisco.

Dr. Susan Desmond-Hellmann, UCSF Chancellor kicked off the afternoon of plenary presentations, breakout sessions and panel discussions at the Mission District’s Women’s Building about our city’s most compelling health issues. Among the voices present were those of key advocates, activists, scientists, policymakers, health workers, public health experts, educators, community service providers, and concerned residents.
Partnership working groups in the areas of physical activity and nutrition, alcohol, children's oral health, Hepatitis B, and high utilizers of multiple services gave an overview of their goals, successes, and challenges, while a panel discussion with representatives from the SF Department of Public Health, UCSF research enterprise, foundations, and community-based organizations mapped action items for collaboration and next steps.

SFHIP is emerging as a major city-wide initiative to promote health and health equity in our community.

The Jonathan Rodnick Colloquium in Innovations in Family and Community Medicine
Thursday, May 30, 2013

The annual Family and Community Medicine Colloquium—dedicated in 2008 to Jonathan Rodnick, MD—celebrates innovations in clinical care, community engagement, medical education, and research with presentations by UCSF faculty, residents, students, and staff, including colleagues from the Department’s affiliated community-based family medicine programs. The colloquium enhances networking and collaboration within our Department and fosters mentoring opportunities for medical students interested in primary care.

This year’s colloquium themed, “Primary Care: The Cutting Edge of Medicine” – took place on Thursday, May 30, 2013, with a keynote address given by Dr. Kevin Grumbach, Department Chair.

Plenary sessions included:

- Towards Elimination of Sexual and Perinatal HIV Transmission: Integrating Reproductive Health Care for HIV-positive Men into the Primary Care Setting
  –Shannon Weber, MSW

- Examining Content of Contraceptive Counseling: A Mixed Methods Analysis
  –Amaranta D. Craig, BS

- Solving the Primary Care Physician Shortage Without More Physicians
  –Thomas Bodenheimer, MD, MPH
