

### **PCMH Resident Curriculum Objectives**

*At the end of this three year practice transformation curriculum, graduates will be able to:*

1. Lead primary care transformation throughout their careers, with skills to implement current models and innovate new models.
2. Describe the components of a high functioning primary care setting.
3. Collaborate effectively on both clinical care and practice improvement projects with team members.
4. Understand the interconnected factors that influence patient health and system function
5. Continue their careers in primary care in underserved settings with satisfaction and joy.
